Advance your compliance strategy with expertise, insight and local support

Bringing products to market has never been more complex. From shifting regulatory expectations to rising consumer and retailer demands, organizations face growing pressure to demonstrate product compliance across diverse markets.

UL Solutions supports manufacturers across industries in navigating this landscape. Whether entering a new market or maintaining market access for existing products, we help you move forward with clarity, confidence and market readiness.

Supporting today's most innovative industries

UL Solutions works with companies in sectors where regulatory change, technological advancement and global expansion converge:

Automotive and Mobility

Technology and Electronics

Energy and Utilities

Health and Life Sciences

Industrial Products and Systems

HVACR

Appliances

Lighting

From early-stage development to ongoing compliance management, we collaborate with your cross-functional teams in product development, engineering, regulatory affairs and more.

What we offer: Global Market Access services

We support multi-market compliance strategies while offering localized insight and assistance tailored to each market's needs.

Global Compliance Management (GCM) software suite

Access real-time regulatory insights, a 360° view of your compliance portfolio and expert guidance so you can take an active, informed approach to managing compliance.

Testing, inspection and certification (TIC)

Demonstrate product safety, performance and conformity with local regulations through ISO/IEC 17025 accredited in-country laboratories, inspections and ISO/IEC 17065 accredited third-party certifications.

Regulatory intelligence and advisory support

Work with local experts to understand evolving requirements, assess compliance gaps and prepare for regulatory shifts across key markets.

Documentation and certification support

Receive guided support through every step of the documentation process, from conformity assessments to label requirements and technical file preparation.

Learning and development

Train your teams on compliance expectations, testing protocols and regulatory frameworks to build long-term readiness and internal capability.

Expertise at global scale, delivered locally

With 150+ locations and 90+ laboratories around the world, UL Solutions offers a globally connected, locally grounded approach. Our experts monitor 300+ regulatory schemes and actively contribute to over 1,300 standards panels, enabling us to anticipate change and guide customers toward informed, timely decisions.

The value of working with UL Solutions

- Accelerated time to market through coordinated certification and testing.
- Improved compliance confidence across product categories and geographies.
- Increased brand confidence through independent conformity assessment and certification.

Simplify the path to market success

Let UL Solutions help you turn global compliance complexity into clear, actionable progress.
