Industrial Control Panel Shop Program

Apply the UL Mark to industrial control panels at your facility

UL Solutions has provided top-rated industrial control panel safety verification services for decades. We are proud to verify your products meet UL 508A, the only industry accepted safety standard for industrial control panels.

As a member of our Industrial Control Panel Shop Program, you can apply the UL Mark to products that comply with U.S. and Canada safety requirements at your facility. This allows for an efficient, economical way to achieve UL certification while allowing maximum flexibility in panel design.

Benefits

Increase your competitive advantage
Bid on jobs that specify UL Solutions Certified ICPs and offer your customers UL Solutions Certified products

Cover all requirements
Cover proper component usage, enclosure environmental ratings, wiring and motor protection, safety markings and conformance to the National Electrical Code (NEC) and Canadian Electrical Code (CEC)

Improve efficiency
Minimize red-tagged panels at the job site, along with the resulting delays and extra cost

Gain widespread acceptance
Regulatory authorities widely accept the UL Mark throughout the United States and Canada

Streamlined component sourcing
Formal component acceptance agreements that permit acceptance of specific components for end-product use, including ICPs, allow flexibility and efficiency in component sourcing

Receive training
Gain expertise through technical training, workshops and advisory services focused on the needs of ICP builders

Most comprehensive ICP program in the industry
Participation includes the industry-recognized UL 508A Standard and maintains Manufacturer Technical Representative (MTR) program requirements. We also conduct follow-up service inspections to maintain annual participation, distinguishing your business from competitors

Our experts work with industrial control panel shops of all sizes to help build trusted brands that meet customer and regulatory demands. Participation demonstrates your commitment to providing safer, code-compliant products and provides a convenient way to receive a UL certification for industrial machinery, elevator control, service equipment, air conditioning and refrigeration equipment, fountain control, irrigation equipment, crane and flame control, and marine use panels.
